PROFESSIONAL SUMMARY

AI Automation Engineer with **5+ years of enterprise IT, infrastructure, and digital transformation experience**, specializing in designing intelligent workflow automation solutions using **n8n, Python, AI Agents, REST APIs, and enterprise integrations**. Proven ability to analyse business processes, identify automation opportunities, and build scalable workflows that improve operational efficiency across **Sales, HR, Recruitment, Customer Support, Finance, and Operations**.

Designed and implemented **30+ automation workflows** that integrate AI services, cloud platforms, ERP systems, CRMs, document processing, and APIs to reduce manual effort and streamline business operations. Currently expanding expertise in **LangChain, Claude AI, GoHighLevel, and Agentic AI** to develop enterprise-grade intelligent automation solutions.

PROFESSIONAL HIGHLIGHTS

- 5+ years of Enterprise IT, Infrastructure & Digital Transformation experience.
- Designed and implemented 30+ workflow automation solutions using n8n and Python.
- Strong experience integrating REST APIs, Webhooks, AI services, and enterprise platforms.
- Built automation solutions across Sales, Recruitment, HR, Customer Support, Finance, and Operations.
- Enterprise IT background spanning Banking, Construction, Education, and Real Estate industries.
- Experienced in ERP administration, Microsoft 365, Active Directory, Windows Server, and enterprise infrastructure.
- Strong understanding of business processes, workflow optimisation, and operational efficiency.

CORE COMPETENCIES

<u>AI Automation:</u>	• Workflow Automation • AI Agents • Business Process Automation • Workflow Orchestration • Prompt Engineering • Retrieval-Augmented Generation (RAG) • OCR & Document Automation
<u>Automation & AI:</u>	• n8n • OpenAI • Claude AI • AI Agents • GoHighLevel • LangChain
<u>Programming:</u>	• Python • JavaScript • SQL • Flask
<u>Integration:</u>	• REST APIs • Webhooks • OAuth 2.0 • JSON • CRM Integration • ERP Integration
<u>Enterprise IT:</u>	• Windows Server • Active Directory • Microsoft 365 • VMware • Networking • System Administration

SELECTED AI AUTOMATION PROJECTS

Enterprise AI Sales Intelligence Platform (*In Progress*)

Designed an AI-powered sales automation workflow that researches prospects, enriches CRM records, generates personalised outreach emails, and routes qualified leads through intelligent sales workflows.

Technologies: n8n | OpenAI | REST APIs | CRM | AI Agents

AI Customer Support Automation Engine (*In Progress*)

Developing an intelligent support automation platform integrating multiple communication channels, AI-powered ticket classification, automated responses, and escalation workflows.

Technologies: n8n | AI Agents | OpenAI | APIs | Helpdesk Integration

AI-Powered LinkedIn Outreach Automation (*Completed*)

Built an end-to-end LinkedIn outreach automation system that validates and qualifies prospects, researches LinkedIn profiles, generates personalized German messages with AI, manages human approval, executes campaigns, and synchronizes campaign results and statuses automatically.

Business Importance: Automates repetitive prospecting and outreach operations, improves lead qualification and personalization, reduces manual processing, prevents duplicate outreach, and provides structured campaign tracking and results synchronization.

Technologies: n8n | Google Sheets | OpenAI GPT-5.5 | Phantombuster | LinkedIn | Webhooks | AI Agents

Enterprise Employee Onboarding Automation (*Completed*)

Built an automated onboarding workflow integrating HR approvals, IT provisioning, document generation, notifications, and task assignments into a standardised business process.

Technologies: n8n | Google Workspace | Gmail | Google Drive | Slack

Intelligent Invoice Processing & OCR Automation (*Completed*)

Developed an AI-assisted workflow that extracts structured invoice data via OCR, validates records, and routes data to business systems.

Technologies: n8n | OCR | AI Processing | PDF Automation

Enterprise Knowledge Management Assistant (RAG) (*Completed*)

Implemented an AI-powered knowledge assistant using Retrieval-Augmented Generation (RAG) to answer business queries using organisational documentation.

Technologies: n8n | OpenAI | RAG | Vector Database

AI Recruitment & Candidate Screening Automation (*Completed*)

Designed recruitment workflows that automate CV collection, candidate screening, interview scheduling, and recruitment communication.

Technologies: n8n | OCR | Email Automation | AI Processing | Google Sheets

PROFESSIONAL EXPERIENCE

MIS / IT Head (Previously MIS Manager)

ABS Developers (PVT.) Ltd. | Lahore, Pakistan

Jan 2024 – Nov 2025

- Lead enterprise IT operations, infrastructure management, and digital transformation initiatives supporting business-critical operations.
- Identify automation opportunities and streamline business processes through workflow optimisation and technology integration.
- Manage Windows Server, Active Directory, Microsoft 365, VMware, ERP systems, networking infrastructure, CCTV, and enterprise applications.
- Administer ERP systems, user access, reporting, and business data while collaborating with multiple departments to improve operational efficiency.
- Implement IT governance, security controls, backup strategies, disaster recovery planning, and business continuity practices.
- Develop technical documentation, SOPs, and user training materials to improve technology adoption and standardise operational processes.

Technologies: Windows Server | Active Directory | Microsoft 365 | VMware | ERP | SQL | Python | REST APIs | Networking

IT Support Engineer | ACG Architects & Developers | Abu Dhabi

Jul 2021 – Sep 2022

- Managed enterprise IT infrastructure, desktop support, networking, and system administration across organisational operations.
 - Installed, configured, and maintained Windows systems, servers, printers, and network devices while ensuring high service availability.
 - Provided technical support, troubleshooting, documentation, and preventive maintenance to minimise operational downtime.
-

IT Trainer | Al Manal Training Center | Abu Dhabi

Feb 2022 – Aug 2022

- Delivered hands-on web development sessions covering HTML5, CSS3, JavaScript, Flask, WordPress, and Shopify CMS platforms.
 - Guided students through real-world projects, strengthening their technical portfolios for job placements.
-

IT Support Engineer | Habib Bank Limited (HBL) | Kabirwala

Mar 2020 – Apr 2021

- Delivered enterprise IT support in a banking environment while maintaining compliance with organisational standards and security procedures.
 - Supported hardware, software, user account management, networking, and system troubleshooting across business operations.
 - Assisted with infrastructure maintenance, incident resolution, and service delivery in a high-availability environment.
-

EARLIER ROLES:

- **IT Support Engineer | Punjab Group of Colleges (2019 – 2020):** Supported campus-wide IT infrastructure, networking, ERP-related operations, and end-user technical support. Maintained computer laboratories, user accounts, software deployment, and daily IT operations.
 - **Computer Instructor | Stars Group of School (2017–2019):** Taught core programming subjects (C++, Data Structures, Assembly Language) and IT security fundamentals to students.
-

EDUCATION

Bachelor of Science in Computer Science (BSCS)
Government College University Faisalabad (GCUF)

LANGUAGES:

- English – Professional Working Proficiency
- Urdu – Native
- Punjabi – Native
